MASS TANK CONTRACTS WITH GOLDWIND TO FABRICATE TOWER FOR PLYMOUTH MA WIND PROJECT

Middleboro, MA- Tuesday, February 21, 2012 – Randy Kupferberg, COO, of Mass Tank Sales Corp announced that Mass Tank and Goldwind USA Inc. have recently signed an agreement for Mass Tank to fabricate a 70 meter tower for the 1.5MW Camelot Wind farm in Plymouth, Massachusetts. The tower will be fabricated in Mass Tank’s Middleboro Massachusetts facility.

“This agreement with Goldwind, one of the world’s largest global wind turbine manufacturers, is consistent with our company objectives of establishing a manufacturing supply chain for the renewable energy projects in our country,” said Stephen Lynch Executive Vice President for Business Development. “We have been working hard over the last two years to expand jobs in Massachusetts in the renewable energy industry and we anticipate steady growth in this effort.”

Goldwind, founded in 1998, has operations in Asia, Australia, Europe and the Americas. “We are pleased to partner with Mass Tank and Camelot Wind on this project,” said Kate Dusett, Vice-President Planning, and Procurement & Logistics for Goldwind USA. “We work with a variety of global suppliers that are ideally suited for given projects in each of the local markets we serve and we are excited to forge yet another strong US supplier partnership with Mass Tank.”

Camelot Wind located in the Camelot Industrial Park off Long Pond Road in Plymouth, Massachusetts will be Plymouth's first operational wind turbine. The 1.5 megawatt turbine received a grant from the Massachusetts Clean Energy Center in support of the design and construction of the project. "We are pleased to be working with both Goldwind and Mass Tank on this project," said Joe Balboni, owner of Camelot Wind. "It's important to work with local companies on projects like the Camelot Wind project because you know that you're creating jobs and opportunity right in your own backyard. And since Mass Tank is only 20 miles away from the site, we know that this is happening right here in Massachusetts."

"This partnership is an example of how clean energy touches companies across the Commonwealth's industries and can provide an important revenue stream to firms that have primary functions outside the clean energy cluster," said Massachusetts Clean Energy Center Chief Executive Officer Patrick Cloney. "We look forward to seeing Mass Tank grow here in Massachusetts."

The project is scheduled to be erected in April.

About Mass Tank (www.masstank.com): Mass Tank is also the leading Steel Storage Tank manufacturer in New England. Mass Tank supplies fabricated ASME, API, and UL products globally.

About Goldwind (www.goldwindglobal.com): Xinjiang Goldwind Science & Technology Co., Ltd. (Goldwind) is the second largest manufacturer of wind turbines in China, and the 4th largest globally. With strong R&D capabilities, the company is the world's largest manufacturer of Permanent Magnet Direct Drive (PMDD) wind turbines, representing the industry's next generation technology. Goldwind is listed on both the Shenzhen Stock Exchange (stock code: 002202) and Hong Kong Stock Exchange (stock code: 2208).
